

Solution for sending pop-up messages over your enterprise-wide LAN

dMessage™ - MGI Consultants

5 rue Sextius Michel 75015 Paris – Tel: +33 (0) 1 53 53 41 00 – Fax: +33 (0) 1 53 53 41 99 – www.dmessage.com

Information diffusion issues
are very expensive for your company.

- Every year, thousands of euros are spent in useless calls to IT support due to a bad communication.
- Every day, important information is repeated or lost in the middle of all daily e-mails.

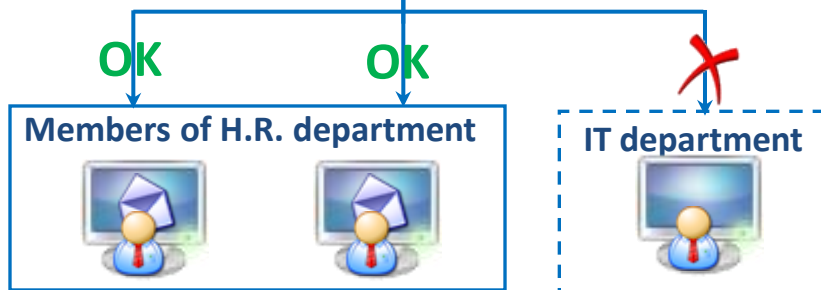

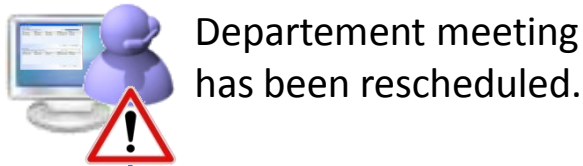

dMessage™ is the solution to:

- Improve **IT support** communication.
- Be sure your messages will **be read immediatly**.
- **Inform** only **concerned** coworkers.

What is dMessage™?

dMessage™ let's you send **targeted pop-up messages** over your **enterprise-wide LAN** (or VPN).

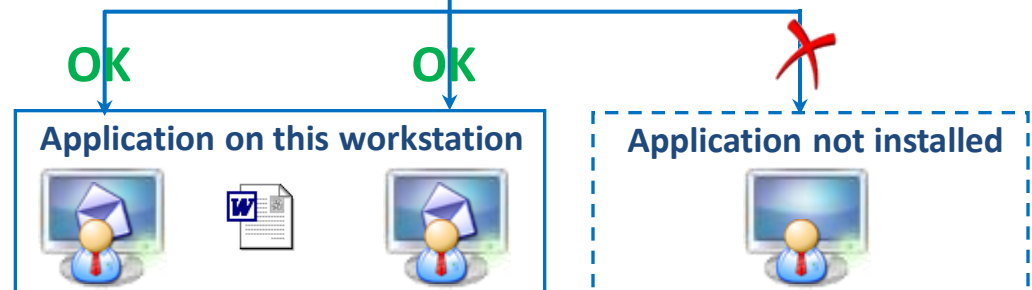

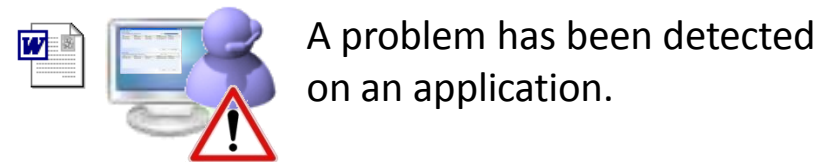

Usefull every day

Message **automatically appears** on HR departments members screens.

Be sure your message will be **instantly read** in opposition to e-mail.

Adapted to IT support

dMessage™ **detect** the workstations on which the application is installed and **pop-up only appears** on those.

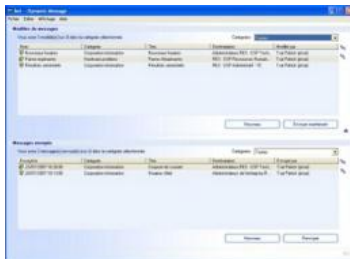

Send pop-ups without **Net Send**, deactivated (XP) or banned (Windows 7) and **filter recipients**.

3 features of dMessage™

What's more in dMessage™?

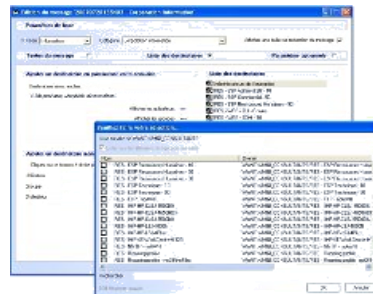

1 Filtering recipients according to your needs

Thanks to its filters library, dMessage™ let's you target recipients according to their workstation configuration.

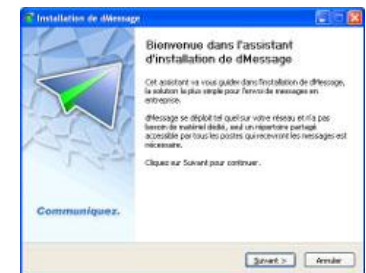

2 Collecting automatically LDAP information

dMessage™ automatically connects to your company LDAP directory. It is instantly operational.

3 Integrating easily into your infrastructure

No dedicated server or database equipment is required. You just need a shared directory to use dMessage™.
